FrontEnd

html
css
javascript
typescript
bootstrap
reactjs

BackEnd

java
jdbc
springboot

Database

mysql
psql

Professional Experience

ATDXT Private Limited, *full stack developer* 2024 – present
coimbatore

Projects

Personal Expense Tracker System

The project is a full-featured **Personal Expense Tracker System** designed to help users efficiently manage their income and expenses. Built using **Core Java** and structured under the **MVC architecture**, the system ensures clear separation of concerns and maintainable code. The **frontend** is developed using **React**, providing a responsive and user-friendly interface, while the **backend** is powered by **Spring Framework** for robust business logic and secure API development.

Obopay – Mobile Payment Platform

Obopay is a mobile payment and digital wallet platform designed to facilitate secure and seamless financial transactions such as money transfers. As a team member on this project, my primary responsibility was to **identify, analyze, and resolve application bugs** across various modules.

ATAL(advance technology and auto launching)

ATAL is a cloud orchestration platform that allows users to launch and unlaunch their projects across multiple regions, providing high availability, scalability, and efficient infrastructure management.
